

HONORABLE RONALD B. LEIGHTON

UNITED STATES DISTRICT COURT  
WESTERN DISTRICT OF WASHINGTON  
AT TACOMA

RICHARD LEE RYNEARSON, III,

Plaintiff,

v.

ROBERT FERGUSON, Attorney General  
of the State of Washington, and

TINA R. ROBINSON, Prosecuting  
Attorney for Kitsap County,

Defendants.

Case No. 3:17-cv-05531-RBL

**BRIEF OF AMICI CURIAE ELECTRONIC  
FRONTIER FOUNDATION AND  
AMERICAN CIVIL LIBERTIES UNION  
OF WASHINGTON IN SUPPORT OF  
PLAINTIFF'S MOTION FOR  
PRELIMINARY INJUNCTION**

TABLE OF AUTHORITIES ..... iii

I. INTEREST OF *AMICI* ..... 1

II. INTRODUCTION ..... 2

III. ARGUMENT ..... 2

    A. The Statute’s restraint on Internet speech violates the First Amendment. .... 2

        1. The First Amendment protects “making an electronic  
            communication.” ..... 3

        2. The First Amendment protects online expression with intent to  
            “embarrass.” ..... 3

        3. The statute’s other prohibitions are overbroad, online and off. .... 5

        4. The statute criminalizes anonymous and repeated speech, which is  
            protected by the First Amendment..... 6

        5. The statute is overbroad because it lacks any requirement of harm. .... 8

    B. Portions Of The Statute Also Violate The Due Process Clause Because  
        They Are Vague..... 9

        1. The term “repeated” is vague..... 9

        2. The phrase “harass, intimidate, torment, or embarrass” is vague. .... 10

    C. Conduct criminalized by phone harassment statutes is qualitatively  
        different from Internet-related speech. .... 11

IV. CONCLUSION..... 12

CERTIFICATE OF SERVICE ..... 13

**I. INTEREST OF AMICI<sup>1</sup>**

The **Electronic Frontier Foundation** (“EFF”) is a San Francisco-based, non-profit, member-supported digital rights organization. Focusing on the intersection of civil liberties and technology, EFF actively encourages industry, government, and the courts to support free expression, privacy, and openness in the information society. Founded in 1990, EFF has over 38,000 dues-paying members nationwide. EFF publishes a comprehensive archive of digital civil liberties information at [www.eff.org](http://www.eff.org). EFF serves as counsel or amicus curiae in many cases addressing free speech online. *See e.g., City of Vancouver v. Edwards*, No. 18998V (Clark County Superior Court 2012); *Backpage.com v. McKenna*, 2:12-cv-00954-RSM (W.D. Wa. 2012); *United States v. Cassidy*, 814 F. Supp. 2d 574, 585-86 (D. Md. 2011); *Savage v. Council of American-Islamic Relations, Inc.*, No. 07-cv-06076-SI (N.D. Cal. 2007).

**American Civil Liberties Union of Washington** (“ACLU-WA”) is a statewide, nonpartisan, nonprofit organization, with over 75,000 members and supporters, that is dedicated to the preservation of civil liberties including the right to free speech. The ACLU-WA strongly opposes laws and government action that infringe on the free exchange of ideas or that unconstitutionally restrict protected expression. It has advocated for free speech and the First Amendment directly, and as amicus curiae, at all levels of the state and federal court systems. *See, e.g., Berger v. City of Seattle*, 569 F.3d 1029, 1034 (9th Cir. 2009).

## II. INTRODUCTION

Amici curiae EFF and ACLU-WA support Plaintiff’s motion for a preliminary injunction to enjoin enforcement of RCW 9.61.260(1)(b) because the First Amendment clearly, and fully applies to protect the Internet speech and other electronic communications impacted by this cyberstalking statute.

Plaintiff properly attacks subsection (1)(b) of RCW 9.61.260, as unconstitutionally vague and overbroad, lacking the precision the First Amendment requires when government regulates speech on the Internet. *Reno v. ACLU*, 521 U.S. 844, 874 (1997).

RCW 9.61.260(1)(b) criminalizes everyday uses of electronic communications such as a parents’ posting of embarrassing photographs of their children on Facebook, or tweeted photos of ugly shirts and bad haircuts by a classmate before a 25-year class re-union.

Plaintiff is correct. Subsection (1)(b) of the cyberstalking statute is unconstitutional.

## III. ARGUMENT

### A. The Statute’s restraint on Internet speech violates the First Amendment.

Under the overbreadth doctrine, a statute violates the First Amendment on its face when “a substantial number of its applications are unconstitutional, judged in relation to the statute’s plainly legitimate sweep.” *United States v. Stevens*, 559 U.S. 460, 473 (2010). The First Amendment’s facial overbreadth doctrine applies fully to Internet speech and other electronic communications. *See, e.g., id.* (striking down a ban on creating and disseminating video depictions of animal cruelty); *Reno*, 521 U.S. 844 (striking down a ban on indecency on the Internet); *Doe v. Marion County*, 705 F.3d 694 (7th Cir. 2013) (striking down a ban on Internet social media use by registered sex offenders); *People v. Marquan M.*, 19 N.E.3d 480 (N.Y. 2014) (striking down a ban on harassment on the Internet).

Here, a substantial amount of constitutionally protected speech is swept up in the statute’s facially overbroad prohibitions.

1           ***1. The First Amendment protects “making an electronic communication.”***

2           The Washington cyberstalking statute is subject to First Amendment scrutiny because the  
3 core activity that it restrains is “mak[ing] an electronic communication” to a targeted person or  
4 any “third party.” RCW 9.61.260(1). “Electronic communication” is broadly defined to cover  
5 any digital transmission of information, including “internet-based communications.” RCW  
6 9.61.260(5). Thus, the statute applies to any conceivable form of modern electronic  
7 communications, including websites, blogs, social media, emails, instant messages, etc. Also, it  
8 applies both to one-on-one communications (such as email), communications to a closed list of  
9 people (such as Facebook), and communications available to everyone (such as a website).

10           It is well-settled that restraints on Internet speech may violate the First Amendment. *See,*  
11 *e.g., Ashcroft v. ACLU*, 542 U.S. 656 (2004) (preliminarily enjoining the Child Online Protection  
12 Act); *State v. Bishop*, 787 S.E.2d 814 (N.C. 2016) (striking down a North Carolina cyberbullying  
13 statute). *See also, e.g., Reno*, 521 U.S. 844; *Doe*, 705 F.3d 694; *Marquan M.*, 19 N.E.3d 480.

14           ***2. The First Amendment protects online expression with intent to “embarrass.”***

15           The core activity restrained by the Washington cyberstalking statute—making an  
16 electronic communication—enjoys the fullest First Amendment protection, even if such a  
17 communication is sent with “intent to . . . embarrass any other person.” RCW 9.61.260(1). A  
18 speaker’s intent to embarrass someone else does not diminish the First Amendment’s protection  
19 of electronic communication. Indeed, the First Amendment protects the right to express messages  
20 that are intended to cause embarrassment, insult, and outrage. *See, e.g., Boos v. Barry*, 485 U.S.  
21 312, 322 (1988) (“[I]n public debate our own citizens must tolerate insulting, and even  
22 outrageous, speech in order to provide adequate breathing space to the freedoms protected by the  
23 First Amendment.”); *Hustler Magazine, Inc. v. Falwell*, 485 U.S. 46, 55 (1988) (emphasizing the  
24 Court’s “longstanding refusal to allow damages to be awarded because the speech in question  
25 may have an adverse emotional impact”); *NAACP v. Claiborne Hardware Co.*, 458 U.S. 886, 910  
26 (1982) (“Speech does not lose its protected character . . . simply because it may embarrass others  
27 or coerce them into action.”); *New York Times v. Sullivan*, 376 U.S. 254, 270 (1964) (“[D]ebate

1 on public issues should be uninhibited, robust, and wide-open, and it may well include vehement,  
2 caustic, and sometimes unpleasantly sharp attacks on government and public officials”). The First  
3 Amendment “may indeed best serve its high purpose when it induces a condition of unrest,  
4 creates dissatisfaction with conditions as they are, or even stirs people to anger.” *Terminiello v.*  
5 *City of Chicago*, 337 U.S 1, 4 (1949).

6 Nothing in First Amendment case law distinguishes First Amendment protection on the  
7 basis of the mode of communication, i.e., online. Such protection exists to cover the nature of the  
8 communication. Hence, the First Amendment should protect online speech intended to cause  
9 “embarrassment” to the same extent as embarrassing speech distributed via broadcast or the  
10 press, particularly because embarrassment caused by online speech has been become quite  
11 common. Examples of online or electronic speech that the statute criminalizes blatantly illustrate  
12 why it violates the First Amendment because it is facially overbroad:

- 13 • A newspaper website editorial argues that an elected public official should be removed  
14 from office because of drunken behavior at a Little League game.
- 15 • A government reform activist publishes on YouTube a video recording of a government  
16 employee stuffing her purse with office pens, and texts the message to her boss, to  
17 embarrass the wrongdoer and the boss, and thus encourage reform.
- 18 • A losing election challenger posts on his website a list of the incumbent’s past domestic  
19 violence arrests.
- 20 • A mother posts on Facebook embarrassing anecdotes and photos each year about her  
21 children, including stories the children might not want shared to commemorate the  
22 children’s birthdays.
- 23 • A college friend publishes embarrassing photos of his former classmates—the out-of-  
24 style hair and clothing!
- 25 • A fellow law partner embarrasses a colleague by posting an excessively laudatory  
26 message on the firm’s web-site about a big “win.”

27 Clearly, the “embarrass” provision of the statute sweeps too broadly, encompassing

1 protected speech within its net and this provision should be stricken. *Reno*, 521 U.S. 844

2 **3. The statute's other prohibitions are overbroad, online and off.**

3 The statute also bans Internet communications sent with intent to “harass, intimidate, [or]  
4 torment” someone else. RCW 9.61.260(1). This speech restraint, also facially overbroad, violates  
5 the First Amendment.

6 Courts have struck down online harassment statutes with similar words as facially  
7 unconstitutional. *Bishop*, 787 S.E.2d at 821 (striking down a ban on posting a minor’s private  
8 sexual information on the Internet with intent “to intimidate or torment”); *People v. Marquan M.*,  
9 19 N.E.3d 480 (N.Y. 2014) (striking down a ban on digital posts with “intent to harass, annoy,  
10 threaten, abuse, taunt, intimidate, torment, humiliate, or otherwise inflict significant emotional  
11 harm on another person”).

12 Likewise, phone harassment statutes that contain similar words have been stricken as  
13 facially overbroad. *State v. Brobst*, 857 A.2d 1253 (N.H. 2004) (striking down a ban on phone  
14 calls with intent to “annoy or alarm”). *See also United States v. Popa*, 187 F.3d 672, 678 (D.C.  
15 Cir. 1999) (holding that a ban on anonymous phone calls with intent to “annoy, abuse, threaten,  
16 or harass” was unconstitutional as applied to a person who repeatedly called a government  
17 officer to complain about the government).

18 Speech bans containing language similar to that in RCW 9.61.260(1)(b) simply do not  
19 pass constitutional muster in any circumstance. For instance in *KKK v. City of Erie*, 99 F. Supp.  
20 2d 583, 591-92 (W.D. Pa. 2000), the court struck down as facially overbroad a ban on wearing a  
21 mask with intent “to intimidate, threaten, abuse or harass.” The court reasoned that there were  
22 too many ways to apply this ban to constitutionally protected messages:

1 A statement, for example, that the white race is supreme and will rise again to  
2 dominate all other races may seem intimidating, or even threatening, particularly  
3 when advocated by a large group of demonstrators showing solidarity. Advocacy  
4 for a return to segregation may likewise be intimidating, particularly if  
5 accompanied by rough language. A diatribe against a local official who is an  
6 ethnic minority, or a homosexual, may be considered “abuse.”

7 *Id.*

8 **4. The statute criminalizes anonymous and repeated speech, which is protected by  
9 the First Amendment.**

10 The statute bans Internet communications, with the requisite state-of-mind, if they are  
11 sent “anonymously or repeatedly.” RCW 9.61.260(1)(b). But the First Amendment protects  
12 anonymous and repeated communications.<sup>2</sup>

13 Online communications protected by the First Amendment are no less protected when  
14 posted anonymously. The statute makes it a crime to make a single electronic communication, if  
15 one does so “anonymously,” and with intent to embarrass (or harass, intimidate, or torment)  
16 another person. RCW 9.61.260(1)(b).

17 Anonymous speech<sup>3</sup> through electronic communications is common across the Internet  
18 and it allows for valuable, protected discussions to occur. Internet anonymity is critical for

---

19 <sup>2</sup> Plaintiff does not at this time challenge the statute’s ban on “lewd, lascivious, indecent, or  
20 obscene” words or images. RCW 9.61.260(1)(a). However, *amici* note that the First Amendment  
21 protects all but “obscene” communication. *Sable Commc’ns v. FCC*, 492 U.S. 115, 126 (1989).  
22 Thus, the prohibition involving “lewd, lascivious, [or] indecent” communication in the statute  
23 may also be constitutionally defective. The statute’s ban on threats, RCW 9.61.260(1)(c), would  
24 violate the First Amendment as applied to speech that is not a “true threat.” At a minimum, the  
25 speaker of an unprotected true threat must have a subjective intent “to communicate a serious  
26 expression of an intent to commit an act of unlawful violence to a particular individual or group  
27 of individuals.” *Virginia v. Black*, 538 U.S. 343, 359 (2003). *See also Elonis v. United States*,  
135 S. Ct. 2001, 2012 (2015) (interpreting a federal threat statute to require a subjective “purpose  
of issuing a threat” or “knowledge that the communication will be viewed as a threat”). *See, e.g.,*  
*Watts v. United States*, 394 U.S. 705 (1969) (protecting the statement, at a protest, that “if they  
ever make me carry a rifle the first man I want to get in my sights is L.B.J.”).

<sup>3</sup> Anonymity can be created through use of pseudonyms. Myriad communication platforms, like  
Twitter, Tumblr, and Reddit, invite speakers to use pseudonyms to participate in public forums  
and private conversations. Email and messaging providers also typically allow speakers to create  
accounts and send electronic communications using pseudonyms.

1 activists and others who could face harm and intimidation for publicly criticizing their powerful  
2 opponents.

3         The First Amendment protects the right to communicate anonymously. *See, e.g., Buckley*  
4 *v. American Constitutional Law Found., Inc.*, 525 U.S. 182 (1999) (striking down a ban on  
5 anonymous solicitation of ballot access signatures); *McIntyre v. Ohio Elections Comm’n*, 514  
6 U.S. 334 (1995) (striking down a ban on anonymous leafleting designed to influence voters in an  
7 election); *Talley v. California*, 362 U.S. 60 (1960) (striking down a ban on any anonymous  
8 leafleting). The Supreme Court has explained:

9             Under our Constitution, anonymous pamphleteering is not a pernicious,  
10 fraudulent practice, but an honorable tradition of advocacy and of dissent.  
11 Anonymity is a shield from the tyranny of the majority. . . . It thus exemplifies  
12 the purpose behind the Bill of Rights, and of the First Amendment in particular:  
to protect unpopular individuals from retaliation—and their ideas from  
suppression—at the hand of an intolerant society.

13         *McIntyre*, 514 U.S. at 357. *See also id.* at 341-42 (emphasizing the use of anonymous  
14 speech by the founders of the American republic).

15         The First Amendment right to communicate anonymously extends to the Internet. *See,*  
16 *e.g., Doe v. 2TheMart.com Inc.*, 140 F. Supp. 2d 1088, 1092 (W.D. Wash. 2001); *Doe v. Cahill*,  
17 884 A.2d 451, 456 (Del. 2005). “Internet anonymity facilitates the rich, diverse, and far ranging  
18 exchange of ideas. The ability to speak one’s mind on the Internet without the burden of the other  
19 party knowing all the facts about one’s identity can foster open communication and robust  
20 debate.” *2TheMart.com Inc.*, 140 F. Supp. 2d at 1092.

21         The statute also criminalizes electronic communication made “repeatedly” and with  
22 intent to embarrass (or harass, intimidate, or torment). RCW 9.61.260(1)(b). But speech does not  
23 lose its First Amendment protection, online or offline, merely because of its repetition. *See, e.g.,*  
24 *Survivors Network of Those Abused by Priests, Inc. v. Joyce*, 779 F.3d 785 (8th Cir. 2015) (in a  
25 case brought by a group that regularly protested outside of churches, striking down a ban on such  
26 protests).

1           There is no compelling state interest in banning repeated electronic communications,  
2 which are commonplace in an electronic environment, such as duplicate e-mail messages.  
3 Moreover, the recipients of unwanted messages typically have simple tools at their disposal to  
4 block, delete, or ignore repeated communications that are unwanted, without ever viewing the  
5 content of the communication itself.

6           **5.       *The statute is overbroad because it lacks any requirement of harm.***

7           The statute’s facial overbreadth is aggravated by the absence of the element of harm to  
8 the subject of the speech or to anyone else.

9           When a law burdens speech, government must “demonstrate that the recited harms are  
10 real, not merely conjectural, and that the regulation will in fact alleviate these harms in a direct  
11 and material way.” *Turner Broad. Sys., Inc. v. FCC*, 512 U.S. 622, 664 (1994) (plurality).

12 Without a demonstration of harm, restraint on speech is not narrowly tailored. *See also United*  
13 *States v. Alvarez*, 567 U.S. 709, 732-37 (2012) (Breyer, J., concurring in the judgment)  
14 (distinguishing the unconstitutional Stolen Valor Act, which did not require proof of actual or  
15 likely harm, from constitutional limits on false speech, which do).

16           Here, the forbidden electronic communication need not cause any actual harm, or even be  
17 seen by the targeted person. Nor does the statute require any proof of any plausible possibility  
18 that the electronic communication might have caused harm to a reasonable person. Because there  
19 are myriad applications of the statute where “the recited harms” are not “real,” *Turner*, 512 U.S.  
20 at 664, the statute is facially overbroad.<sup>4</sup>

21  
22  
23  
24 \_\_\_\_\_  
25 <sup>4</sup> A limiting construction cannot save the statute. At its core, the statute prohibits what the First  
26 Amendment protects: Internet communication that is intended to embarrass, if sent in a manner  
27 that is anonymous, repeated, or indecent. *See Reno*, 521 U.S. at 884 (limiting constructions are  
allowed only if the statute is “readily susceptible” to such construction, and courts cannot  
“rewrite” the statute).

1 **B. Portions Of The Statute Also Violate The Due Process Clause Because They Are**  
2 **Vague.**

3 A criminal statute that is vague violates the Due Process Clause of the Fourteenth  
4 Amendment. The vagueness doctrine applies with “particular force” to laws that restrain speech.  
5 *Hynes v. Borough of Oradell*, 425 U.S. 610, 620 (1976). “[T]he void-for-vagueness doctrine  
6 requires that a penal statute define the criminal offense with sufficient definiteness that ordinary  
7 people can understand what conduct is prohibited and in a manner that does not encourage  
8 arbitrary and discriminatory enforcement.” *Kolender v. Lawson*, 461 U.S. 352, 357 (1983). *See*  
9 *also City of Chicago v. Morales*, 527 U.S. 41, 60 (1999) (criminal statutes must “establish  
10 minimal guidelines to govern law enforcement”).

11 **1. The term “repeated” is vague.**

12 The statutory term “repeated,” RCW 9.61.260(1)(b), is vague as applied to online  
13 communications.<sup>5</sup> Because online communications, such as messaging and social media  
14 interactions, tend to resemble real-time oral conversations rather than time-delayed written  
15 correspondence, it is unclear when an offending communication will be considered “repeated.”  
16 Consider three common online scenarios. First, some electronic communicators may send  
17 multiple short transmissions in quick succession (such as “hello” followed by “how are you”).  
18 Second, some electronic communicators correspond via multiple transmissions on both sides in  
19 quick succession (such as “hello”, “hello yourself”, “how are you”, and “ok”). Third, a sender  
20 might transmit a message to one person, and then quickly forward it to a second person. It is  
21 possible for any of the foregoing to be considered “repeated” communications due to the  
22 imprecision of the meaning of “repeated,” making the communicators vulnerable to prosecution  
23 under RCW 9.61.260(1)(b).  
24  
25

26 

---

<sup>5</sup> The word “repeatedly” is also unconstitutionally vague in the context of offline harassment  
27 statutes. *Commonwealth v. Kwiatkowski*, 637 N.E.2d 854 (Mass. 1994).

1           **2.       *The phrase “harass, intimidate, torment, or embarrass” is vague.***

2           The terms “harass, intimidate, torment, or embarrass,” RCW 9.61.260(1)(b), are also  
3           unconstitutionally vague, particularly in the context of Internet speech. A person who  
4           communicates on social media and other Internet channels often does not know who will receive  
5           their messages, and whether the recipients are susceptible to embarrassment, intimidation,  
6           torment, or harassment.

7           For each of these statutory terms, the application of the statute will turn on the  
8           unpredictable effect of words on people with varying sensibilities. In *KKK*, the court on  
9           vagueness grounds struck down a ban on wearing a mask with intent to intimidate, threaten,  
10          abuse, or harass. The court explained: “To some extent, the speaker’s liability is potentially  
11          defined by the reaction or sensibilities of the listener,” and “what is ‘intimidating or threatening’  
12          to one person may not be to another.” 99 F. Supp. 2d at 592.

13          Likewise, in *State v. Bryan*, 910 P.2d 212 (Kan. 1996), the court struck down as  
14          unconstitutionally vague a statute against “following” where doing so “seriously alarms, annoys  
15          or harasses.” The court reasoned: “In the absence of an objective standard, the terms ‘annoys,’  
16          ‘alarms,’ and harasses’ subject the defendant to the particular sensibilities of the individual  
17          victim. Different persons have different sensibilities.” *Id.* at 220. *See also Coates v. City of*  
18          *Cincinnati*, 402 U.S. 611 (1971) (striking down a ban on “annoying” loitering); *City of Bellevue*  
19          *v. Lorang*, 140 Wn.2d 19, 992 P.2d 496, (2000) (striking down a ban on phone calls lacking a  
20          “legitimate” purpose).

21          The nature of the Internet, and social media postings in particular, exacerbate this  
22          forbidden unpredictability. In *KKK* and *Bryan*, the speakers could not predict the impact of their  
23          speech on the finite and knowable set of people that they physically encountered. On the  
24          Internet, speakers simply cannot predict the impact of their speech on the infinite and  
25          unknowable set of people that might come across their speech in cyberspace.

1 **C. Conduct criminalized by phone harassment statutes is qualitatively different from**  
2 **Internet-related speech.**

3 Internet communications are materially different than phone communications. Thus,  
4 while Washington courts have upheld telephone harassment and threat statutes against  
5 overbreadth and vagueness challenges, the Washington cyberstalking statute addresses  
6 fundamentally different conduct. *See State v. Alphonse*, 147 Wn. App. 891, 197 P.3d 1211  
7 (2008); *State v. Alexander*, 888 P.2d 175 (1995); *State v. Dyson*, 74 Wn. App. 237, 872 P.2d 1115  
8 (Ct. App. 1994); *City of Seattle v. Huff*, 111 Wn.2d 923, 767 P.2d 572 (1989). These courts  
9 relied on distinctively invasive features of phone calls that are not shared by Internet  
10 communications. *See Alexander*, 888 P.2d at 180 (“The gravamen of the offense [of telephone  
11 harassment] is the thrusting of an offensive and unwanted communication upon one who is  
12 unable to ignore it.”); *id.* at 179 (“[A] ringing telephone is an imperative which must be obeyed  
13 with a prompt answer.”); *Dyson*, 872 P.2d at 1120 (“[T]he telephone . . . presents to some people  
14 a unique instrument through which to harass and abuse others.”). Moreover, “the recipient of a  
15 telephone call does not know who is calling, and once the telephone has been answered, the  
16 victim is at the mercy of the caller until the call can be terminated by hanging up.” *Alexander*,  
17 888 P.2 at 179. Finally, “telephone communication occurs in a nonpublic forum.” *Id. Accord*  
18 *Huff*, 767 P.2d at 574.

19 Unlike a phone call that is directed to one person, a Facebook update, a Tweet, and a blog  
20 post are directed to many people. Where a phone call “occurs in a nonpublic forum,” *Alexander*,  
21 888 P.2 at 179, the “vast democratic forums of the Internet” are today “the most important places  
22 (in a spatial sense) for the exchange of views.” *Packingham v. North Carolina*, 137 S. Ct. 1730,  
23 1735 (2017). *Cf. Frisby v. Schultz*, 487 U.S. 474, 486 (1988) (distinguishing a protest directed at  
24 a specific person’s home, which is not protected, from a protest directed at all of the homes in a  
25 neighborhood, which is protected). Moreover, while a phone call can “thrust[] an offensive and  
26 unwanted communication upon one who is unable to ignore it,” *Alexander*, 888 P.2 at 180,  
27 people have tools of choice to avoid unwanted electronic communications.

1 Even one-to-one digital communications, like many emails and text messages, lack key  
2 features that might justify telephone harassment statutes. Recipients of electronic  
3 communications, unlike recipients of phone calls, can more easily avoid unwanted messages. No  
4 ring requires an immediate response; email recipients can delay review at their discretion. There  
5 is no risk that a recipient will accidentally speak to a person they are avoiding; email recipients  
6 can decide which messages to delete without reading their contents. *Cf. Reno*, 521 U.S. at 869  
7 (“the Internet is not as ‘invasive’ as radio or television,” because it does not “‘invade’ an  
8 individual’s home or appear on one’s computer screen unbidden”).

#### 9 IV. CONCLUSION

10 For the reasons above, *amici* Electronic Frontier Foundation and American Civil  
11 Liberties Foundation of Washington respectfully request that this Court grant Plaintiff’s motion  
12 for preliminary injunction, and strike down RCW 9.61.260(1)(b) in Washington’s cyberstalking  
13 statute as facially overbroad in violation of the First Amendment and vague in violation of the  
14 Fourteenth Amendment.

15 Dated this 21<sup>st</sup> day of August, 2017.

16 Respectfully Submitted,

17 GARVEY SCHUBERT BARER
